## DETAILED ACTION

### ***Reassignment Affecting Application Location***

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit **2617**.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ekstrom et al (Ekstrom), U.S. Patent No. 6,148,069 in view of Pelletier et al (Pelletier), U.S. Patent Pub. No. 2004/0017908.

Regarding claims 1-20, Ekstrom discloses a control component that comprises an interface usable by an administrator to designate one or more announcements that are playable in a communication session as interruptible (i.e., announcement terminates

when voice or DTMF tones are detected (col. 5, lines 55-65) or uninterruptible (col. 5, line 60-col. 6, line 10).

Ekstrom, however fails to disclose wherein one or more tones are designated as interruptible.

In a similar field of endeavor, Pelletier discloses a system and method for providing network information service using CID-Type messages.

Pelletier further discloses wherein one or more tones are designated as interruptible (i.e., wherein the press of the asterisk key or star key or any other ***predetermined*** feature invoking key interrupts the dial tone information stream) (paragraph 0023, figure 2).

At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Ekstrom with the teachings of Pelletier for the purpose of allowing a user to quickly access desired information.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson et al, U.S. Patent No. 5,155,760, discloses voice messaging system with voice activated prompt interrupt.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
